## **Junior & Senior Port Engineers**

### **The Ports & Maritime Divisions:**

Royal Haskoning's Maritime & Coastal divisions are international market leaders for advisory services in the ports, terminals, shipyards and general coastal development sectors. We have all the expertise and experience needed for these projects in-house. With projects like New Orleans coastal management, Maasvlakte 2, the Dubai Palm projects and Sakhalin Energy LNG terminal but also in Vietnam: Nghi Son refinery seaport, Cai Mep container terminal and Singapore LNG terminal we pride ourselves in being involved in the most important port infrastructure projects around the world.

We support clients during all phases of maritime & coastal developments, from preliminary feasibility studies, master-planning and environmental impact assessment studies to financial analysis, design and implementation.

Our successful operation and performance in such projects leads to an increasing demand for our world class services. In our office in Ho Chi Minh, Vietnam we are **now looking for 3 new positions:**

1. Senior Ports Structures Engineer
2. Junior Ports Structures Engineer
3. Port Construction Supervisor

### **Your technical profile:**

You like working in an international environment. For the senior positions, you have gained at least 05 years experience in structural engineering related to ports or coastal structures preferably in a consultancy firm. For the junior positions, we require you to have at least 01 year experience in structural engineering related to ports or coastal structures.

### **Your personal profile:**

- You like to travel overseas and to work in an international – mainly Asian - environment.
- You enjoy tackling the interesting technical questions for which clients seek our support.
- You like to work in an ambitious environment with professionals who pride themselves in being market leaders in their specific fields

### **Your qualifications and experience:**

- Bachelor's or Master's degree in Civil Engineering
- More than 05 years experience in Structural Engineering relating to Maritime and/or Coastal projects for senior positions
- More than 01 year experience in Structural Engineering relating to Maritime and/or Coastal projects for junior positions
- Experienced in structural design/analysis of maritime structures
- Mastery of the English language
