Senior Port Structures Engineer Vietnam

The Maritime & Coastal Divisions:

Royal Haskoning's Maritime & Coastal divisions are international market leaders for advisory services in the ports, terminals, shipyards and general coastal development sectors. We have all the expertise and experience needed for these projects in-house. With projects like New Orleans coastal management, Maasvlakte 2, the Dubai Palm projects and Sakhalin Energy LNG terminal we pride ourselves in being involved in very interesting projects.

We support clients during all phases of maritime & coastal developments, from preliminary feasibility studies, master-planning and environmental impact assessment studies to financial analysis, design and implementation.

Our successful operation and performance in such projects leads to an increasing demand for our world class services. One of the regions where we want to serve our clients more is South East Asia, from a new office in Ho Chi Minh, Vietnam. **We are now looking for 01 (One) Ports Structures Engineer** who will assist in growing this new office and take the technical leadership over a team of local port engineers in developing new terminals and ports in the region.

Your technical profile:

You like working in an international environment. You have gained at least 04 years experience in structural engineering related to ports or coastal structures preferably in a consultancy firm.

Your personal profile:

- You like to travel overseas and to work in an international – mainly Asian - environment.
- You enjoy tackling the interesting technical questions for which clients seek our support.
- You like to work in an ambitious environment with professionals who pride themselves in being market leaders in their specific fields

Your qualifications and experience:

- Bachelor's or Master's degree in Civil Engineering
- More than 04 years experience in Structural Engineering relating to Maritime and/or Coastal projects for senior positions
- Experienced in structural design/analysis of maritime structures
- Mastery of the English language

Would you like to know more?
